

Responsible Investment and Transaction Services

Who we are

TAUW is a European consultancy and engineering firm with a strong position in environmental consultancy and sustainable development of the living environment. From offices in the Netherlands, Belgium, Germany, France, Spain and Italy, more than 1,200 dedicated TAUW professionals shape a vital living environment by providing impactful solutions and combining strong expertise with valuable partnerships.

At TAUW, sustainability is part of nearly everything we do and is reflected in our services. Through the years, we have built up a large network of interdisciplinary experts in a variety of fields. It is precisely this combination of in-depth technical and organisational know-how, paired with detailed industry knowledge and consulting expertise, which distinguishes TAUW from other consultants in the field of environmental consultancy.

We advise and support multinational industries, investors, real estate companies and public authorities in making impactful decisions for sustainable development. We offer a broad range of services and provide support on environmental issues ranging from strategic consultancy to environmental monitoring and on-site technical support to transactional services.

With our unique combination of management consulting expertise and the diverse technical knowledge of the entire TAUW Group network, we are able to address the individual needs of our clients and translate them into concrete added value for their business decisions.

Technical expertise. Global resources.

We can rely on an extensive network of regional offices in Europe and an excellent worldwide network. This allows us to work closely with our customers and develop country-specific solutions that fit local needs and regulatory frameworks. Our country-specific experience and long-standing relationships with clients make us ideally suited to provide strategic and technical support in environmental related questions.

TAUW is a founding partner of the international consulting network CAT Alliance. With more than 10.000 experts in more than 50 countries worldwide, CAT provides environmental and transactional services under a single umbrella. For more information cat-alliance.com.

Responsible Investment and Transaction Services

In M&A processes, our customers can rely on our competences when it comes to considering environmental (liability) risks and sustainability issues. The experienced Transaction and Responsible Investment team supports investors worldwide on environmental due diligence, health and safety compliance as well as ESG management. We rely on pragmatic, customer-oriented solutions with the aim of a clear and structured presentation of business implications and potential risks.

Over the past 25 years, we have continuously expanded our services in response to the needs of our clients and the changing market and legislative landscape by now being able to offer our clients a wide range of services.

Typical services we deliver:

Responsible Investing Services

- ESG Policy Development
- ESG consulting
- ESG Due Diligence
- Preparation of roadmaps for certifications (BREEAM, LEED, DGNB)

Transaction Services

- Pre-transaction consulting
- Phase I EDD / Phase II EDD
- Post transaction consulting

Compliance

- Compliance consulting and management
- Health and Safety advisory
- Environmental Permitting

Site development

- Design of soil and groundwater remediation
- Innovations in soil and groundwater quality management
- Dismantling and demolition
- Risk and project management
